

Wireless Network Configuration Guide Android 3.1 +

Please check that you are using the **correct help-sheet** by checking your version of Android:
Menu > Settings > About Phone > Android Version

Most Android versions since 3.1 follow these steps to connect to a Massey network

Network Access

All users connecting to the network require Massey credentials.

- **Students:** Student ID + Password
- **Staff:** Usercode + Password

The password used is your **network password**, not Portal password

1. Turn on your Wi-Fi. Then select the Wireless network you'd like to connect to.

- **MUStudents** - Student users on any equipment
- **MUStaffPrivateEquipment** - Staff using private or non-Massey equipment
- **MUStaff** - Staff using Massey-managed equipment (those with an ITXXXXXX number)
- **MUGuests** – visitors can use this network

2. Select **MSCHAPV2** under the *Phase 2 authentication* heading

3. Enter your **Student ID** [or **Usercode**] into the *Identity* box

4. Leave the *Anonymous identity* box blank

5. Enter your **Password** into the *Password* box

6. Tap **Connect** and you're done! 😊
