

## Wireless Network Configuration Guide Windows 10

Please check that you are using the **correct help-sheet** for your operating system. This guide covers Windows 10 devices.

### Network Access

All users connecting to the network require Massey credentials.

- **Students:** Student ID + Password
- **Staff:** Usercode + Password

The password used is your **network password**, not Portal password

1. Click on the Network Icon

2. A list of wireless networks will appear.
  - **MUStudents:** for students
  - **MUStaff:** for staff using Massey equipment
  - **MUStaffPrivateEquipment:** for staff using privately owned equipment
  - **MUGuests** – visitors can use this network
3. Select **MUStudents** and click on **Connect**

**Ticking the “Connect automatically” box is optional.**

	<p>4. A dialog box will open prompting for your username and password. Enter your <b>Student ID</b> and <b>Password</b> into the boxes respectively.</p> <p>5. Click <b>OK</b></p>
	<p>6. A certificate prompt will appear. Click on <b>Connect</b> to accept the certificate.</p>
	<p>7. You should now be connected to the Massey network.</p>
