MODEL FOR THE STATEMENT OF EXPECTATIONS

**Please complete the Statement of Expectations on a separate sheet
and attach to the back of this application form.**

The Candidate, Supervisor and Co-Supervisor(s) must sign the Statement of Expectations.

Careful attention to the Statement of Expectations provides a sound basis for the development of a good professional relationship between the Candidate and Supervisors. While the following is a **Sample Only**, it provides a clear indication of what the Doctoral Research Committee expects to see when a candidate seeks Provisional Registration. The Candidate and Supervisor(s) are agreeing that the following should be met in order to proceed to full registration.

(a) **Academic Performance Standards**

This is a statement of the Academic Performance Standards which the supervisors will expect the applicant to meet. The standards should be measurable to enable the supervisor to clearly determine whether the applicant can be recommended for full registration following the Confirmation of Registration event (normally 12 months for full time and 18 months for part time PhD candidates; DClinPsych candidates normally complete the Confirmation of Registration at the end of their first academic year). While it is recognised that some of the categories may not be relevant to a particular discipline or programme, supervisors should select those that are relevant and both the supervisors and the candidate should be clear about the standards against which the candidate will be judged in terms of progression to full registration. It should be made clear to the candidate that failure to meet the Performance Standards will result in his/her registration being delayed up to 6 months and/or terminated. A maximum of 30 credits of course work is permitted in the provisional year; the requirement is a passing standard of B+ or better for each paper.

Below lists some areas of criteria that supervisors and candidates should consider:

- Complete specified *course work* and achieve a grade of B+ or better in each paper (if applicable). Please note that candidates are permitted to enrol in a maximum of 30 credits in the Provisional Registration year. ***It is preferable that course work is completed prior to Provisional Registration.***
- A *full* proposal outlining the scope of the study, conceptual framework, the methodology to be employed, the selection of case studies, the objectives for each phase of the research, the outputs for each phase, the timetable, and the mode of analysis to be used, will have been approved.
- A *literature review* will be substantially complete
- A *chapter framework* will be drafted
- The aims of the study will have been presented at a *research seminar* or similar (and/or at the Confirmation of Registration event)
- Regular attendance at academic unit seminars and meetings
- Any other specific requirements
- In addition, it is recommended that written work will have been submitted through Turnitin plagiarism programme to check for correct referencing.

(b) **Communication Arrangements**

This is the proposed arrangements for ensuring adequate contact between applicant and supervisor(s), including off-campus supervisor(s). Consideration should be given to such issues as: frequency and length of applicant/supervisor(s) meetings; turnaround times for feedback on written work by the applicant; and the responsibilities or contributions of supervisors.

Checklist

- The Supervisors will provide overall guidance and will facilitate reasonable access to resources and personnel as needed.
- The Candidate will meet with the Supervisor and Co-Supervisor(s) on a regular basis. If scheduled appointments cannot be kept, the Supervisor will make alternative arrangements.
- The Candidate will produce material for Supervisor and Co-Supervisor(s) to read at least one week before an arranged meeting.
- The Supervisors will undertake to supply both written and verbal comments on this work.
- The turn around time for written comments from the Supervisors will be negotiated between the Candidate and the Supervisors but normally will not exceed 10 - 14 days.
- The Supervisors and Candidate will ensure that Six Monthly Reports are forwarded to the Doctoral Research Committee in a timely manner.

I confirm that: (please tick the boxes)

- I have discussed the 'Statement of Expectations' with the applicant
- I have discussed the 'Statement of Expectations' with the Co-Supervisor(s)
- I have advised the applicant what level of achievement is required before registration can be confirmed
- A signed copy of the Statement of Expectations is attached to this application, signed by myself, the applicant, and co-supervisor(s).**

RESEARCH PROPOSAL GUIDELINES

In assessing your readiness to undertake a doctoral degree, the following guidelines will be used. Please prepare a proposal of 1000-3,000 words (maximum) in length. Try to provide as much information as possible under each heading. However, do not worry if your ideas and understandings are not fully developed at this stage. The key purpose of the proposal is to find out 'where you are at' in your thinking.

Motivation

Why? Where do you see this taking you?

Topic

In this first section of your proposal, your potential supervisors will be looking for evidence that you have clearly identified and justified the topic of your proposed enquiry. You will need to discuss the context or background to the study for the reader:

- Title
- Why is this a topic that needs to be investigated?
- What do we already know about the topic?
- What are the key landmark studies or theoretical positions in the topic area and what findings and theories have they generated?
- What does the map of the topic area look like and how has this changed over time?
- Where are the gaps in our existing knowledge?
- What, in summary, does the literature suggest are the 'tensions' or dilemmas of educational practice that exist within this topic area?

Research Questions

What are the research questions, issues or problems you wish to investigate in your study?

Methods

What research methods are appropriate to help you address one or more of the basic questions you wish to investigate?

How will you collect data? Have you shown the link between each research question and the data gathering tool(s) you will use?

Data Analysis and Presentation

How will you analyse and present your data?

Please ensure that your proposal also contains the following information and statement:
